## Office Action Summary

Application No.

10/815,755

Applicant(s)

TAKESHIMA, MASAO

Examiner

Patricia L Engle

Art Unit

3612

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 4/20/04.
- ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_.
- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: \_\_\_\_.

## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Specification*

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 2, 12, 13 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Bettin et al. (US Patent 6,533,339).

Regarding claims 1 and 13, Bettin et al. disclose a structure of a storage section for a saddle-ridden type vehicle (100) comprising: a storage indent (118) that is indented downwardly is provided on an inclined plane portion (116) of a fender (110) that covers a wheel (132); and a

Art Unit: 3612

lid (140) that opens and closes an opening of the storage indent is also swingably provided on the inclined plane portion (116) of the fender.

Regarding claims 2 and 14, Bettin et al. disclose the structure of a storage section for a saddle-ridden type vehicle as disclosed in claim 1, wherein the storage indent is integrally molded with the fender (column 3, lines 34-35).

Regarding claim 12, Bettin et al. disclose the structure of a storage section for a saddle-ridden type vehicle as disclosed in claim 1, wherein the wheel is the left front wheel.

5. Claims 1, 2, 13, 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kohyama et al.

Regarding claims 1 and 13, Kohyama et al. disclose a structure of a storage section for a saddle-ridden type vehicle (1) comprising: a storage indent (52,42) that is indented downwardly is provided on an inclined plane portion (51,41) of a fender (30) that covers a wheel (11); and a lid (53,43) that opens and closes an opening of the storage indent is also swingably provided on the inclined plane portion (51,41) of the fender.

Regarding claims 2 and 14, Kohyama et al. disclose the structure of a storage section for a saddle-ridden type vehicle as disclosed in claim 1, wherein the storage indent is integrally molded with the fender (Fig. 9).

### ***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3612

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 3, 4, 7, 15, 16 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bettin et al.

Regarding claims 3, 4, 15 and 16, Bettin et al. do not disclose the details of the container. The Examiner takes Official Notice that it is well known to provide a space for a seal around a periphery of an opening and to mount the seal on the lid for the opening. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide a seal for the lid of the storage compartment of the saddle-ridden type vehicle of Bettin et al. The motivation would have been to allow storage of water and dirt sensitive items in the storage compartment while using the vehicle in the rain or off-road. The storage compartment is disclosed as being used for rescue vehicles- therefore it would have been obvious to seal the storage compartment to allow the first aid supplies to stay dry and clean.

Regarding claims 7 and 19, Bettin et al. disclose that the storage container could be made of separate pieces. Bettin et al. do not disclose the lid details. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide a support section on the fender for supporting the pivoting lid. The motivation would have been to allow the storage container to be inserted from the underside of the fender and to allow for an aesthetically pleasing transition between the fender and the storage container while allowing for support of the lid.

8. Claims 3-6, 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohyama et al.

Regarding claims 3, 4, 15 and 16, Kohyama et al. do not disclose the details of the container, however, Fig. 9 shows an indent around the edge of the periphery of the opening.

Art Unit: 3612

Kohyama et al. do not disclose a seal on the lid. The Examiner takes Official Notice that it is well known to provide a space for a seal around a periphery of an opening and to mount the seal on the lid for the opening. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide a seal for the lid of the storage compartment of the saddle-ridden type vehicle of Kohyama et al. The motivation would have been to allow storage of water and dirt sensitive items in the storage compartment while using the vehicle in the rain or off-road.

Regarding claims 5, 6, 17 and 18, Kohyama et al. disclose a dividing wall portion along the periphery of the edge of the opening (Fig. 9).

9. Claims 8-11, 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohyama et al. in view of Lemmen (US Patent 6,062,623).

Kohyama et al. disclose the structure of a storage section for a saddle ridden type vehicle as disclosed in claims 3, 5 and 15. Kohyama et al. do not disclose that the lid includes a coupling arm portion (claims 8, 9 and 20) and a spring biasing the lid open (claims 10 and 11). Lemmen discloses a lid for an opening which includes a coupling arm portion (31) extending from the lid and a spring (90) biasing the lid open attached to the swing movement support portion (17) on the vehicle body portion. It would have been obvious to one of ordinary skill in the art at the time of the invention to include a coupling arm portion and a spring bias to the lid mechanism of Kohyama et al. The motivation would have been to allow the lid to be pivoted open and closed on the fender.

Art Unit: 3612

*Conclusion*

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art discloses other storage structures and other hinge structures for lids.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia L Engle whose telephone number is (703) 306-5777.

The examiner can normally be reached on Monday - Friday from 8:00 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, D. Glenn Dayoan can be reached on (703) 308-3102. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
